The Circle of Security is an engaging approach which helps parents and caregivers to connect with their young children in ways that help develop a secure attachment.

Research has shown that a healthy attachment style promotes increased empathy, greater self-esteem, better relationships, enhanced school readiness, and an increased capacity to handle emotions more effectively.

Come and learn what your child is saying. Understand when your child is asking us to "be with them". By the end of program, parents/carers can knowingly work at enhancing their skills to promote secure attachment. In presenting this parenting program the facilitators maintain a strong non-judgemental and confidential approach in order to increase learning.
