An Online Survey of Parents of Adolescents (10-18 year olds)

To complete the survey go to:
exp.psy.uq.edu.au/parentingsurvey

Help us find out more about what works and doesn't work in parenting!

Are you the parent of a 10-18 year old child who has never been diagnosed with cancer?

Could you help with a survey aimed at exploring how parenting influences the parent-adolescent relationship and adolescent behaviour and emotions both for healthy teenagers and for teenagers undergoing treatment for cancer?

What you will do: Parents will answer questions about their child's behaviour and feelings, their parenting, and their relationship with their child.

This research is completely voluntary and confidential. It will take approximately 30 minutes.

This project is part of a study investigating the ways parents promote the health and wellbeing of teenagers. Findings from the study will be used to assist us to better support families of teenagers diagnosed with cancer.
